Jeeva S

Data Scientist | AI/ML Engineer

91jeevanick@gmail.com | +91 9345738892 | Chidambaram, Tamil Nadu

LinkedIn/Jeeva S | Github.com/JeevaS01

Professional Summary

Recent graduate with strong hands-on foundation in Python, MySQL, Machine Learning, Deep Learning, NLP, Computer Vision, LLMs, RAG, EDA, Pandas, NumPy, Data Visualization, and AWS. Developed multiple AI/ML projects demonstrating end-to-end model building and cloud integration. Passionate about transforming data into actionable intelligence, seeking entry-level Data Scientist or AI/ML Engineer role to contribute to innovative, high-impact solutions.

Technical Skills

Python, SQL, Machine Learning, Deep Learning, Computer Vision, NLP, LLM & RAG, OpenAl, Hugging Face, TensorFlow, Exploratory Data Analysis, Statistical Analysis, Data Visualization, Power BI, AWS, Cloud Computing.

Projects

UrbanBot.AI (Smart City Analytics Platform – GitHub: [Link])
Key Skills: Python, MySQL, Computer Vision, NLP, YOLOv8, LLM, RAG, Machine Learning, Deep Learning, AWS.

- End-to-end smart city platform using **YOLOv8** for real-time Computer Vision detection of Infrastructure, accidents, traffic, and crowds (achieving ~**85–95% mAP**) and **AWS RDS** storage for live analytics.
- Built **NLP** & sentiment analysis pipeline with **NLTK** to automatically categorize citizen complaints, assign urgency/**priority** levels, and delivering **~80%+** classification accuracy on urban complaint data.
- Engineered multi-agent **RAG**-based **LLM** chatbot (**GPT-OSS-120B**) connected to **AWS RDS** for **SQL** querying, **SMTP** email alerts, and scalable deployment on **AWS EC2/S3**, providing real-time urban insights and **automated** decision support.

Multi Disease Prediction (Streamlit – GitHub: [Link])
Key Skills: Python, Machine Learning, Scikit-learn, Streamlit, Data Preprocessing, EDA.

- Using **Streamlit** for user-friendly interface, integrating **ML** models (**Logistic Regression, Random Forest, XGBoost**) to classify Different type of Disease based on health parameters
- Performed comprehensive **EDA** and preprocessing with Pandas, NumPy and **Scikit-learn** on UCI datasets.
- Achieved **F1** Score **92–98%** on real-time data with superior **ROC** curves (**AUC 90–96%**), including risk alerts and health tips.

AI Echo: Your Smartest Conversational Partner (Streamlit – GitHub: [Link])
Key Skills: Python, Data Preprocessing, NLTK, EDA, Transformers, Streamlit, Data Visualization.

- Developed an end-to-end **Sentiment Analysis** pipeline using **Python** and **NLTK** to classify ChatGPT user reviews, applying advanced text preprocessing and **EDA** to uncover critical customer satisfaction trends.
- Architected including **VEDAR, TEXTBOB** and **BERT** to categorize sentiments into Positive, Neutral, and Negative, achieving high **precision** and **recall** metrics for automated feedback analysis.
- Engineered an interactive **Streamlit dashboard** to visualize **real-time** sentiment insights and business analytics, enabling data-driven feature prioritization and brand reputation management.

Education

GUVI Geek Network Private Limited - IITM Pravartak, *08/2025 - 01/2026* | Chennai
Master of Data science

Annamalai University, *2023 – 2025* | Chidambaram
Master of Science (Computer Science)

Shree Raghavendra Arts & Science College, *2020 – 2023* | Chidambaram
Bachelor of Science (Computer Science)

Certifications

- **Advanced Data Science** - IITM Pravartak
- **Microsoft Power BI** - GUVI GEEK NETWORK PRIVATE LIMITED
- **Python & MySQL** – SAMCORE SOLUTION
